# Transfer of energy

## Across

- 4. A good conductor of heat
- 6. A material which allows conduction to take place easily.
- 8. The process by which a liquid can change to a gas by means of heating.
- 9. A material which does not allow conduction to take place easily.
- 10. The process by which a gas can change to a liquid by means of cooling.

## Down

- 1. The correct scientific word for heat energy
- 2. The process by which heat may be taken from one place to another by a liquid or gas circulating.
- 3. The process heat travels through solids and the energy being passed from particle to particle.
- 5. Moving energy from one place to another
- 7. what does a liquid turn into when it is warm
