

Transversals and Angle Relationships

Across

1. Two angles that lie on opposite sides of the transversal and outside the two parallel lines are _____

angles.

3. Two angles that together have a sum of 90 degrees are _____

angles.

5. Two lines that do not intersect and will never meet are called _____ lines.

6. Two angles that lie on opposite sides of the transversal and inside the two parallel lines are _____

angles.

7. Two lines that intersect to form a right angle are called _____

lines.

8. Two angles that share a common side and are "next to" each other are called _____

10. The area inside of the parallel lines is the _____ region.

11. Two pairs of opposite angles formed by two intersecting lines are called _____.

12. Two angles that together have a sum of 180 degrees are _____

angles.

Down

2. A line that intersects two or more other lines is called a _____

4. Angles on the same side of the transversal and in the same position are called _____

angles.

9. The area outside of the parallel lines is the _____ region.
