# Trashy!

## Across

4. What are the small pellets used to make plastics called?
6. These are what keep the Great Pacific Garbage Patch in place
8. One of the "Three R's" to help keep our world clean and healthy!
9. After thousands and thousands of years, plastics degrade into this.
10. When something can be broken down by living organisms.
11. The study of trash.

## Down

1. The presence of something in the environment that can cause harm
2. This is the heart of economics-- everything is created so that it must be replaced soon.
3. This happens when the cost of shipping and disposing of trash in a foreign country is cheaper than to dispose of it in a landfill at home.
5. This is Ms. Tieff's favorite color.
7. This is short for the Great Pacific Garbage Patch.
