

# Types of Energy

## Across

2. Energy of motion  
 3. Produced when a rise in temperature causes atoms and molecules to move faster and collide with each other  
 6. Energy that is stored within an object due to the objects position or arrangement  
 8. The energy of electromagnetic and gravitational radiation  
 9. Energy released when a chemical reaction takes place

10. A type of energy Kinetic energy cause by moving electric charges

## Down

1. Energy stored in moving objects  
 4. Movement of energy through a substance, like air or water, caused by vibrations  
 5. Energy released by nuclear fusion or nuclear fission. Comes from the nucleus of an atom  
 7. The only form of energy that can be seen by the human eye
