

Types of waves in Physics

Across

- 4. in physics LAMDA means what
- 5. slinky being plucked
- 7. travels thru the earth's interior
- 8. waves that move side to side
- 9. travels thru the earth's crust

- 11. travels thru only solid rock
- 12. wave that disables any electronic devices
- 13. ripples on water

Down

- 1. rolls along the ground
- 2. waves that can travel thru any medium
- 3. mp3 transformer
- 6. when hitting a clear prism it splits into different colors
- 10. travels thru solid rock and fluids
