

Name: _____

Date: _____

Unicellular organisms

Across

5. Microscopic protozoan that conducts photosynthesis
7. Tail-like structure that promotes movement for cells
8. Respond to something and moves
9. Contracts excess water from the cytoplasm and expels of it
10. Process in which the cell secretes and expels of wastes

Down

1. Contains 1 cell
2. Responds to chemicals and moves either towards or away from it
3. Responds to light and either moves towards or away from it
4. Have extending and retracting psueodopods
6. Large substances from the outside environment enter the cell
