

# Unit 1: Vocabulary

## Across

1. This is the distance around a circle
3. This is a quadrilateral with 4 equal sides and 4 right angles
6. This is a polyhedron with 2 congruent parallel faces
9. This is the amount of space on a flat surface.
12. This is a line segment crossing through a center point with both endpoints on the circle

13. This is a closed object with 2 parallel circle bases connected by a curved surface

14. This is a perfectly round 3-D shape and circular

17. This is a quadrilateral with opposite sides parallel

18. This is the sum of all the 2D space that make up a 3D figure

## Down

2. This is a parallelogram with opposite side congruent (equal)
4. This is a polygon with 3 sides

5. This is a 4-sided polygon

7. This is a quadrilateral with 4 right angles

8. This is a quadrilateral with only 2 parallel sides

10. This is the distance around a 2-dimensional shape

11. This is the distance from the center of a circle to any point on the circle or sphere

15. This is the amount of space in a 3-D object

16. This is a locus of points at a fixed distance from a center point
