

Name: _____ Date: _____ Period: _____

Unit #1: Infectious Diseases

- | | |
|---|-------------------------------|
| 1. What is the term that causes infectious diseases? | A. Meningitis |
| 2. What is the acronym for the Stages of Infectious Diseases? | B. Vaccine |
| 3. What is a network of vessels that carry a clear fluid called lymph through the body | C. Mononucleosis |
| 4. Bacteria that grow inside a wound | D. Lymphocytes |
| 5. How infectious diseases are spread | E. Lyme Disease |
| 6. acts as physical barrier between environment and internal tissues/organ. Mouth, eyes, nose. | F. Chicken Pox |
| 7. Moist, protective linings that help trap pathogens | G. Tuberculin Test |
| 8. Smallest pathogen, living in a cell. | H. Viruses |
| 9. A second line of defense, it fights infection and promotes healing. | I. Salmonellosis |
| 10. A class of white blood cells that consist of small and large lymphocytes. There are two main classes of lymphocyte (B cells) and (T cells). | J. Antibiotic Resistance |
| 11. Acute, self-limiting, and highly contagious viral infection of the upper respiratory tract. | K. Lymphatic System |
| 12. Acute, contagious respiratory infection characterized by sudden onset, fever, chills, headache. | L. PtoP, F+W, E+A |
| 13. Bloodborne virus that causes disease affecting the liver. | M. Tetanus |
| 14. Disease caused by a virus; highly contagious, itchy rash | N. Bacteria |
| 15. Acute infectious disease with enlargement of lymph nodes. | O. Common Cold |
| 16. Determines past or present tuberculous infection based on a positive skin reaction. | P. Amebic dysentery |
| 17. Disease from the bite of a tick | Q. Common Infectious Diseases |
| 18. any disease that is caused by an agent that has invaded the body | R. Infectious Disease |
| 19. tiny, single-celled organisms, some of which can cause disease | S. Inflammation Defense |

20. a condition in which bacteria can no longer be killed by a particular antibiotic	T. Pathogens
21. a substance usually prepared from killed or weakened pathogens or from genetic material and that is introduced into a body to produce immunity	U. Mucous Membranes
22. a change that a person notices in his or her body or mind and that is caused by a disease or disorder	V. I.P.A.R.C.
23. an inflammation of the membranes covering the brain and spinal cord	W. Hepatitis
24. a bacterial infection of the digestive system, usually spread by eating contaminated food	X. Influenza
25. an inflammation of the intestine caused by an amoeba	Y. Body Defense
26. Common cold, Influenza, Hepatitis, Mumps, Chicken Pox, Mono	Z. Symptom
