

Unit 2

Across

3. the hardest known mineral
 8. rocks formed from intense heat and pressure
 12. warm air rising and cool air falling
 14. a statement about a natural phenomenon
 15. description that tells older rocks are under younger rocks
LAW OF
 17. rocks formed from cooling of lava
 18. the time it takes half of the radiation to go

19. explanation in science backed by a lot of research
 22. the only liquid layer of the earth

Down

1. all of the gases and air
 2. anything dealing with earth is part of it
 4. all living things
 5. rocks melt and turn into this
 6. rocks formed from sediments into layers
 7. when an unstable isotope breaks down into a stable one
RADIOACTIVE

9. the hottest layer of the earth
 10. the layer of the earth we stand on
 11. the thickest layer of the earth
 13. the continuous path that rocks go through for years and years
 16. the supercontinent
 20. all water falls under this
 21. found in sedimentary rocks that can tell of the past
