

Unit 2- Forms of Energy

Across

2. The ability to do work

8. The bouncing back of light rays from a surface

10. The path through which an electric current cannot flow

12. A closed conducting circle or loop through which current can flow

13. Energy that is absorbed or delivered by an electric current

14. Matter that light travels through such as air or water

Down

1. The flow of electricity through a conductor

3. Energy of motion

4. Energy related to the temperature of an object or substance

5. The path through which an electric current can flow

6. Energy produced by vibrations

7. The bending of light as it moves through one medium into another

9. A form of energy which our eyes can detect

11. Energy flows from negative to _____
