

# Unit 3.1 Project

## Across

- 5. a piece of data based on numbers
- 8. facts and statistics collected together for reference or analysis
- 10. a subset of a population
- 13. a smaller group of a population
- 15. a method of grouping sets
- 16. statistics in which it gives you conclusion
- 18. type of data in which variables exist in naturally occurring orders

- 20. data measured along a scale

## Down

- 1. data that labels variables without adding numerical values
- 2. statistics in which you make inferences from
- 3. data based on numerical values
- 4. what the you derive from the data
- 6. the practice or science of collecting and analyzing numerical data in large quantities

- 7. data collected from a sample

- 9. a statistic measured from population
- 11. the total number of all members of a group
- 12. an educated guess on what data means
- 14. a method of gathering data from individuals
- 17. data based on non-numerical characteristics, qualities per say
- 19. data that can be compared to other values
