

Name: _____

Date: _____

Unit 3

Across

4. A single shot or bullet in a shotgun shell
 5. The diameter of the bore of a firearm or the cartridge that it fires, expressed in hundredths of an inch
 8. Numerals, letters, and symbols on the base of a cartridge showing the manufacturer failover, and code
 10. Lead spheres in a shotgun shell
 12. Part of the firearm that contains a cartridge for firing
 14. The interior diameter of a gun barrel
 16. The part on the firearm whose function is to throw a spent casing from the gun after firing

18. The interior diameter of a shotgun barrel

19. The bore of a gun barrel that has been machined to form a forced spiral, much like a helix

Down

1. Grooves around a bullet that provide a means of crimping the cartridge case to the bullet
 2. Parallel sets of scratches in a barrel caused by unique markings in the bore of a rifled weapon
 3. A color test for the presence of nitrite in gunpowder residue
 6. The raised areas between two grooves in the rifling of a gun barrel that impart groove on the bullet

7. A container that holds cartridges under spring pressure to be fed the gun's chamber, also called a clip

9. Gunshot residue consisting of burned and unburned powders

11. Spiral cuts into the bore of a barrel that give the bullet its spin or rotation

13. Portion of the gun that contains the firing mechanism

15. Basic units of weight in the British system

17. Hooked or crescent shaped part attached to the breechblock which withdraws the spent casing from the chamber when the breechblock separates from the barrel after firing
