Unit 3 Circles and Volume

Across

- **3.** The point where a line only hits one point of a circle.
- **6.** an arc whose measure is less than 180.
- 8. POINTS THAT ARE OUTSIDE THE CIRCLE
- 9. A ______ is a line that is tangent to 2 circles.
- 11. a _____ connects the center of sphere to any points on sphere.

- **12.** an arc whose measure is greater than 180.
- **14.** _____ are Coplanar circle with the same sentence.
- 15. two circle are
 _____ if and only if
 they have congruent radii.
 17. Half of sphere

Down

- 1. an arc whose measure is equal to 180.
- 2. POINTS THAT ARE INSIDE THE CIRCLE

- **4.** two coplanar circle intersect at exactly one point are called_____
- **5.** A line that intersects a circle at two points.
- **7.** a angle whose vertex is the center of circle.
- **10.** A line that intercepts the circle at the point of tangency.
- 13. Unbroken part of circle
- **16.** A line segments with both endpoints on the circle.
