

Name: _____

Date: _____

Unit 3 Vocab

Across

5. Energy is neither created nor destroyed.
6. When energy moves through a substance through touch
13. Potential energy that depends on an objects height
15. Energy produced during nuclear fusion or fission
16. Energy produced by vibrations

Down

1. Energy that is stored as a result of position
2. Energy emitted via electromagnetic waves or rays
3. Objects in motion
4. Potential energy that is stored as a result of deformation of an elastic object.
7. Energy that is stored in chemical bonds
8. Heat energy

9. When heat is transferred by convection in a substance. Aka, cold sinks and warm rises
10. The movement/emission of energy through particles
11. A form of energy that results from accumulation of charged particles
12. Energy from the movement of atoms
14. Measuring the average kinetic energy of particles in a system
