

Name: _____

Date: _____

Unit 5 Vocab

Across

3. Energy cannot be created or destroyed
 5. A source of energy that can be used to transformed in to energy to meet people's needs
 9. A liquid fossil fuel formed from decayed marine organisms
 10. Power obtained from the kinetic energy of moving air
 12. The energy carried in sound waves through matter
 14. Energy passed from atom to atom through direct contact
 16. The potential energy stored in the nucleus of an atom

19. A fossil fuel that formed millions of years ago from dead plants and animals

20. Energy derived from the heat in the interior of the earth

21. A form of potential energy found in foods

22. Movements of objects

Down

1. The potential energy of position or place

2. A natural resource that can be replenished

4. A natural resource that cannot be replenished

6. Heat transferred by electromagnetic waves

7. Electricity generated from the energy of moving water

8. Fuel created from living matter, such as trees and crops

11. A gaseous fossil fuel formed from marine organisms that is often found above a layer of oil

13. The kinetic energy of electromagnetic energy carried through waves

15. The kinetic energy in the form of heat

17. The transfer of heat by the movement of a fluid

18. A natural gas that formed millions of years ago
