

Unit 7 Module 31

Across

2. the relatively permanent and limitless storehouse of the memory system. Includes knowledge, skills, and experiences.

5. The processing of information into the memory system

10. a momentary sensory memory of auditory stimuli, if attention is elsewhere, sounds and words can still be recalled within 3 or 4 seconds.

11. The process of getting information out of memory storage.

12. a newer understanding of short term memory that focuses on conscious, active processing of incoming auditory and visual-spatial information, and of information retrieved from long-term memory.

Down

1. retention independent of conscious recollection (Also called nondeclarative memory)

3. the immediate, very brief recording of sensory information in the memory system.

4. activated memory that holds a few items briefly, such as the seven digits of a phone number while dialing, before the information is stored or forgotten.

6. The persistence of learning over time through the encoding, storage and retrieval of information

7. memory of facts and experiences that once can consciously know and “declare”. (Also called declarative memory)

8. The process of retaining encoded information over time

9. a momentary sensory memory of visual stimuli, a photographic or picture-image memory lasting no more than a few tenths of second.
