## Unit 9 Vocabulary

Across
9. An exact location in space 10. Two angles that are opposite and formed by two interesting lines
11. A line that intersects two coplanar (in the same plane) lines at two distinct points
13. An angle whose measure is more than 90 and less than 180 degrees
15. Consists of two rays that have a common endpoint
16. Part of a line with one endpoint
17. Type of interior angles that are supplementary if lines are parallel Down

1. An angle whose measure is 180 degrees
2. The point that is in the middle of a segment
3. Three of more points that lie on the same line
4. Two segments or angles with the same measurement 5. Two angles whose sum is 90
5. Two angles that are adjacent and whose
non-adjacent sides are opposite rays
6. Two angles whose sum is 180
7. Type of Interior Angles that are Congruent if lines are parallel
8. An angle whose measure is more than 0 and less than 90 degrees
9. Part of a line with two endpoints
