

Name: \_\_\_\_\_

Date: \_\_\_\_\_

# Upper Extremity

## Across

3. Nerve that innervates the rhomboid muscle  
 4. Muscle group of that hand that originates above, or proximal to the wrist joint  
 6. The flexor carpi ulnaris muscle is innervated by which nerve  
 7. The deltoid and supraspinatus do \_\_\_\_\_ of the shoulder joint (Action)  
 10. Muscle that stabilizes the shoulder joint  
 18. The deltoid and teres minor are both innervated by the \_\_\_\_\_ nerve  
 21. Both the biceps and supinator muscle do this action  
 22. Supraspinatus, infraspinatus, teres minor, and subscapularis are all muscles part of the \_\_\_\_\_  
 26. Muscle that is not a prime mover in any joint action, but assists in elbow extension  
 29. Muscle that originates on the spinous processes of the middle and lower thoracic vertebrae  
 30. Muscles that adduct the fingers  
 31. Muscle responsible for scapular retraction

## Down

1. Muscle that originates on the distal one-fourth of the ulna and inserts on the distal one-fourth of the radius  
 2. Muscle that adducts the thumb (CMC joint)  
 5. Nerve that innervates the brachialis and the biceps muscle  
 8. Muscle that inserts on the palmar aponeurosis  
 9. Muscle that originates on the anterior surface of the distal half of the humerus  
 11. Muscle that opposes the thumb (CMC joint)  
 12. Muscle that inserts on the outer third of the clavicle, and acromion process  
 13. Muscle that inserts on the olecranon process of the ulna  
 14. Action of the triceps  
 15. The flexor carpi radialis and the extensor carpi radialis longus do what action  
 16. Muscle that originates on the lateral supracondylar ridge on the humerus  
 17. Muscle that inserts on the medial floor of the bicipital groove of the humerus

19. The flexor carpi radialis and flexor carpi ulnaris are responsible for wrist \_\_\_\_\_  
 20. Muscle responsible for elbow flexion and forearm supination  
 23. Nerve that innervates the brachioradialis, triceps, anconeus, and supinator muscle  
 24. The extensor carpi ulnaris inserts on the base of which metacarpal  
 25. Muscle innervated by the lower subscapular nerve (C5, C6, C7)  
 27. Prime mover for shoulder abduction  
 28. \_\_\_\_\_ muscles of the hand have their proximal attachment at or distal to the carpal bones and have function on the thumb or fingers

## Word Bank

Fifth	palmar interosseus	Deltoid	Upper Trapezius	Latissimus Dorsi	Axillary
supination	Radial	Triceps	Lower trapezius	Musculocutaneous	palmaris longus
Elbow extension	Adductor pollicis	Abduction	Radial deviation	Rotator cuff	Intrinsic
Opponens pollicis	Anconeus	Brachialis	Middle Trapezius	Dorsal scapular	Extrinsic
Flexion	Teres major	pronator quadratus	Biceps	Coracobrachialis	Ulnar
Brachioradialis
