# Urinary System

## Across

3. Where collected filtrates become urine  
 4. Abnormal accumulation of fluids in body  
 7. Stimulates kidneys to retain more fluids  
 9. Skin resiliency  
 10. Sack that stores urine  
 12. Hollow tubes from kidneys to bladder

## Word Bank

Nephron  
 Ureters  
 Urethra  
 Medulla  
 Aldosterone

13. Release of urine from bladder  
 14. Inner region of kidneys  
 15. Tube that removes urine from body

## Down

1. Cluster of blood capillaries in Bowman's Capsule  
 2. Monitors blood pressure and filtrates

5. Composed of Bowman capsule and glomerulus  
 6. When water is unavailable  
 8. Filtering unit of kidneys  
 11. Outer region of kidneys

Renal Tubules  
 Turgor  
 Cortex  
 Urination  
 Renal Corpuscle

Juxtaglomerular Apparatus  
 Bladder  
 Glomerulus  
 Edema  
 Dehydration
