

Volcanoes!

Across

2. Region of earth's crust where tectonic plates meet

4. Rupture in the earth's crust. Allows hot lava, volcanic ash, and gases to escape from magma chamber below earth's surface.

6. Opening in earth's crust where lava, ash, and hot gases flow

8. Built around the volcanic vent. Steep conical hill.

9. Cloud of ash/lava fragments carried through the air vapor

10. Gently sloping sides. Broad domed volcano

Down

1. Volcanic activity that occurs within the tectonic plates

3. Area of volcanic activity

5. Body of intrusive igneous rock.

7. Bowl cavity in the ground
