Vocab- Properties and Changes of Matter

Across

5. Measurement of resistance
9. Ability for a solid to change shape through hammering
10. Derived unit of measurement
11. Substance precipitating from a solution
14. Temperature which a solid turns into a liquid

15. resistance to flow
16. One of two processes used to separate mixtures

Down

1. Ability to conduct heat and electricity
2. When two substances combine to create a new substance
3. Behavior of a substance when it undergoes chemical change
4. Ability of a substance to burn
6. Physical properties change
7. Characteristics of matter
8. Temperature which liquid turns into gas
12. Ability to react to something
13. One of two processes used to separate a mixture
