Vocab Review

Across

- 2. Angles with the same measure
- 5. Two dimensional shape that extends forever
- 6. A point in the middle
- 8. Given fact (true)
- 10. Adjacent supplementary angles (2 angles that are side by side and add up to 180 degrees)
- 11. Two things that cross
- 12. Figure with four equal straight sides and four right angles
- 17. A ray cutting an angle in half
- 21. Extends in two directions forever through two points
- 22. Half of a line
- 23. A dot
- 24. Equal segments
- 25. A line that stops at two points

- 27. All items in sample space that are NOT chosen
 - 29. Points or lines on the same plane
 - 30. Made up of two rays sharing a common endpoint
 - 32. Boundary of a curved geometric figure, especially a circle
 - 33. Angles side by side (sharing a common side)
 - 34. Figure with four straight sides and four right angles
 - 35. A line that cuts a segment into two equal parts
- Down**
- 1. Points on the same plane
 - 3. Two angles that add up to 90 degrees
 - 4. Common endpoint
 - 7. Two angles that add up to 180 degrees
 - 9. Two angles formed by an intersecting line

- 13. How to find the distance between two points
- 14. How likely something is to occur (event over total)
- 15. Amount of space inside a shape
- 16. Distance around a shape
- 18. Figure with three straight sides and three angles
- 19. The two rays
- 20. Figure whose boundary consists of points equidistant from a fixed point
- 26. How far something is
- 28. Two rays in opposite directions (makes a line)
- 31. The degree value of an angle (#)
