

Name: _____ Date: _____

Vocabulary Set #3: 8th Grade Integrated Science - Messina B8

Across

- 6.** A solution that contains all the solute it can hold at a given temperature.
7. The amount of solute needed to make a saturated solution using a given amount of solvent at a certain temperature.
9. A combination of two or more substances that are NOT chemically combined.
10. The substance in which the solute is dissolved.

Down

- 1.** A measure of the amount of solute dissolved in a solvent.

- 2.** A mixture in which particles of a material are dispersed throughout a liquid or gas but are large enough that they settle out.
3. An increase of the concentration of a solution beyond saturation point.
4. A type of mixture that appears to be a single substance but is composed of particles of two or more substances that are distributed evenly amongst each other.
5. The substance that is dissolved.
8. To make a liquid thinner/weaker by adding another solvent to it.
