

Vocabulary Set #9: 8th Grade Integrated Science - Messina B8

Across

2. Plants that can and are engineered to withstand extreme weather.

7. One of the oldest forms of biotechnology (choosing two specific species to breed, for example, dogs).

10. How modern science is applied to human life and reproduction.

13. One of the oldest forms of biotechnology.

14. Living organisms whose genetic material has been artificially manipulated through genetic engineering.

15. Animal DNA that is altered by humans, made to produce more, faster; products contain fewer hormones, antibiotics, cholesterol.

Down

1. Plant DNA altered by humans.

3. The process of growing human tissues and organs in labs.

4. Plants that are genetically modified and are altered to become insect resistant.

5. "Picture" of DNA.

6. Technology based on a biological system or living organism.

8. The process of manually adding new DNA to an organism, genetically engineering organisms.

9. The creation of genetically identical organisms.

11. Utilizes viruses or bacteria to enter cell and replace defective genes.

12. Field of science that studies Microbes, in which they can work for or against humans.
