

# Vocabulary Words 1

## Across

2. a triangle in which all three sides are congruent

7. of an angle, greater than 90 degrees

10. the long side of a right triangle that is opposite the right angle

11. of an angle, less than 90 degrees

13. a triangle in which one angle is greater than 90 degrees

15. a triangle in which all three sides are different lengths

17. the angles opposite each other formed when two lines intersect

18. the angle formed where two perpendicular lines meet; it measures 90 degrees

19. two angles that add up to 90 degrees

20. an angle of 180 degrees

## Down

1. angles that share a vertex and a side

3. a triangle in which all three angles are less than 90 degrees

4. a triangle in which one angle is 90 degrees

5. two angles that add up to 180 degrees

6. a triangle in which two sides are congruent

8. the point where the sides of an angle or geometric solid comes together

9. having the same shape and size

12. a figure formed by two rays with a common endpoint

14. a triangle in which all angles are equal

16. a part of a line having a point at one end
