

Vocabulary words: Biology

Across

- 3. what is the center of an atom
- 5. a substance that can't be decomposed into simpler substances
- 8. an attraction between two atoms that already participate in other chemical bonds
- 10. one or more species of atoms with a chemical element with the same atomic number but with different atomic masses

- 11. sharing an electron pair between two atoms
 - 12. attraction of molecules for other molecules of the same kind
- Down**
- 1. what's a substance formed with two or more chemical elements
 - 2. A negative charged particle
 - 4. a group of atoms bonded together

- 6. a complete transfer of valence electrons between atoms
- 7. what is the attraction between unlike molecules
- 9. an atom or molecule with a net electric charge due to the loss or gain of one or more electrons
