

Name: _____ Date: _____ Period: _____

Water Cycle

Across

4. Liquid that forms the seas, lakes & rain.
 8. The process in which water (in the form of rain, snow, sleet or hail) falls from clouds in the sky.
 9. The process in which water vapor (a gas) in the air turns into liquid water. Condensing water forms clouds in the sky. Water drops that form on the outside of a glass of icy water are condensed water.
 10. The process in which some water within plants evaporates into the atmosphere. Water is first absorbed by the plants roots, then later exits by evaporating through the pores in the plant.

Down

1. The process in which liquid water becomes water vapor (a gas). Water vaporizes from the surface of oceans and lakes, from the surface of the land and from melts in snow fields.
 2. The process in which water pools in large bodies (like oceans, seas and lakes).
 3. Rain, snow melt, or other water that flows in uderground streams, drains or sewers.
 5. A series of events that repeat in the same order.
 6. Rain, snow melt or other water that flows in surface streams, rivers or canals.
 7. A very large body of water.
 11. A living organism of the kind exemplified by trees, shrubs and herbs etc.
