# \*Water Cycle\*

## Across

2. Water vapor given off by plant photosynthesis
4. A land area that is covered with a shallow layer of water during some or all of the year
7. An area where the freshwater of a river meets the salt water of the ocean
8. Water that seeps into rocks and between particles of soil
9. Precipitation that flows over land into streams and rivers and later enters oceans

10. An underground layer of rock or soil that holds water

## Down

1. The measure of salt content in a body of water
3. Pores or openings that allow water to flow through them
5. Caused by excessive nutrients entering a body of water, increasing the presence of algae
6. The study of water
