# Water Cycle

## Across

2. A combination of water vapor lost through evaporation and transpiration

4. Water on top of the ground enters into the soil

9. the whole body of salt water that covers nearly three fourths of the surface of the earth

11. Rain, Snow, Sleet or Hail that falls to the ground

12. a form of precipitation consisting of ice pellets, often mixed with rain or snow

13. The draining away of water (or substances carried in it) from the surface of an area of land

14. atmospheric water vapor frozen into ice crystals and falling in light white flakes or lying on the ground as a white layer.

15. Large amounts of water are stored in the ground

16. Energy from the sun

## Down

1. water which collects as droplets on a cold surface when humid air is in contact with it

3. The process of turning water into vapor

5. moisture condensed from the atmosphere that falls visibly in separate drops

6. A slowly moving mass or river of ice formed by the accumulation and compaction of snow on mountains or near the poles.

7. Frozen water turning into liquid water

8. Water vapor that leaves a plant through the stomata

10. pellets of frozen rain which fall in showers from cumulonimbus clouds
