

Water and Solutions

Across

2. Solution of 2 or more solids.
4. Any other part of the solution other than the solvent.
7. When mixtures are uniform.
8. Something that contains more than one type of element/compound.
9. A substance whose smallest particles include more than one element chemically bonded together (ionic and covalent).
10. Non-uniform mixtures.

Down

1. A mixture of 2 or more substances that is uniform at the molecular level; has the same amount of ingredients everywhere.
3. The part of a mixture that there is more of.
5. 14 out of every 25 atoms in the alloy are gold atoms, and the rest are silver.
6. A group of atoms held together by covalent bonds.
