

# Water cycle

**Across**

- 2. Changing from a solid to a liquid
- 3. The continuous movement of water from earths surface to the atmosphere and back again
- 5. Changing from liquid to a gas at temperatures below boiling
- 9. Water that falls to earths surface in different forms

- 10. Water that moves across earths surface of land into streams,lakes, pond,river etc.
- 11. Changing from liquid to solid
- 12. Changing from a gas to a liquid

**Down**

- 1. A body of water, often an artificial lake,which is used to store water for human use

- 4. A change from one state of matter to another.
- 6. An undercover layer of porous rock and/or sand that contains water
- 7. The release of water vapor from the leaves of plants.
- 8. A large, slowly moving body of snow and ice
