

Name: _____

Date: _____

Water

Across

2. The draining away of water (or substances carried in it) from the surface of an area of land, a building or structure
6. A form of precipitation consisting of ice pellets, often mixed with rain or snow
7. A visible mass of condensed water floating in the atmosphere, typically high above the ground
8. The process of turning from liquid into vapor
9. Pellets of frozen rain that fall in showers from cumulonimbus clouds
10. Moisture condensed from the atmosphere that falls visibly in separate drops
11. Tiny drops of water that form on cool surfaces at night when atmospheric vapor condenses

Down

1. Water that collects as droplets on a cold surface when humid air is in contact with it
3. Rain, snow, sleet, or hail that falls to the ground
4. Atmospheric water vapor frozen into ice crystals and falling light white flakes or lying on the ground as a white layer
5. The cycle of processes by which water circulates between the earth's oceans, atmosphere, and land, involving precipitation as rain and snow, drainage in streams and rivers, and return to the atmosphere by evaporation and transpiration
