

Weather

Across

- 1. Location of most of Earth's water
- 3. Tool that measures air pressure
- 12. Tool that measures the amount of precipitation
- 13. Tool that measures wind direction
- 15. Water soaking into the ground
- 16. Where warm air pushes into cold air

- 17. Water vapor turns into liquid water

Down

- 2. Tool that measures wind speed
- 4. Evaporation through the leaves of plants
- 5. Liquid water turns into water vapor
- 6. Water that falls from the sky
- 7. Where cold air pushes into warm air
- 8. Lines that connects places with equal air pressure
- 9. Tool that measures air temperature
- 10. Water stored underground
- 11. Water that flows across the land
- 14. Result of condensation
