

Weather Terms

Across

- 1. a large body of circulating air with low pressure at its center and higher pressure outside of the system
- 3. large bodies of air with distinct temperature and moisture characteristics
- 7. a violent winter storm characterized by freezing temperatures, strong winds, and blowing snow
- 12. describes wind, temperature, and humidity conditions above earth's surface

- 13. The amount of water vapor in the air
 - 14. The temperature at which air is fully saturated
 - 15. an intense tropical storm with winds exceeding 119km/h
- Down**
- 2. a large body of circulating air with high pressure at its center and lower pressure outside of the system
 - 4. the amount of water vapor present in the air compared to the maximum amount of water vapor could contain at the temperature

- 5. Water in liquid or solid form that falls from the atmosphere
- 6. describes a set of weather measurements made on earth's surface
- 8. The pressure that a column of air exerts on the air, or surface, below it
- 9. a violent, whirling of air in the column of air in contact with the ground
- 10. a boundary between two air masses
- 11. nd, and the atmosphere
