

# Weather Vocab V.2

**Across**

- 2. A storm with thunder and lightning and typically also heavy rain or hail.
- 5. A system of winds rotating inward to an area of low atmospheric pressure, with a counterclockwise (northern hemisphere) or clockwise (southern hemisphere) circulation; a depression.
- 9. A cloud forming a towering mass with a flat base at fairly low altitude and often a flat top, as in thunderstorms.
- 11. Resembling the tropics, especially in being very hot and humid.
- 12. An overflowing of a large amount of water beyond its normal confines, especially over what is normally dry land.
- 13. Something connected with the sea, especially in relation to seafaring commercial or military activity.

- 14. An event in which varieties of precipitation are formed that only occur at low temperatures, such as snow or sleet, or a rainstorm where ground temperatures are low enough to allow ice to form.
- 15. A storm with a violent wind, in particular a tropical cyclone in the Caribbean.

**Down**

- 1. A cloud that is made of ice crystals and look like long, thin, wispy white streamers high in the sky.
- 3. A weather system with high atmospheric pressure at its center, around which air slowly circulates in a clockwise (northern hemisphere) or counterclockwise (southern hemisphere) direction. Anticyclones are associated with calm, fine weather.

- 4. The coming from or characteristic of mainland Europe.
- 6. Directly opposite in character or tendency.
- 7. A cloud forming rounded masses heaped on each other above a flat base at fairly low altitude.
- 8. A mobile, destructive vortex of violently rotating winds having the appearance of a funnel-shaped cloud and advancing beneath a large storm system.
- 10. A cloud forming a continuous horizontal gray sheet, often with rain or snow.
