# Weather Vocabulary

## **Across**

- 2.** When war air mass runs into a cold air warmer air moves faster than the cold air
- 6.** a measure of what the temperature feels like because of the humidity
- 11.** Clouds that form on the ground
- 12.** occurs when a cold air mass runs into a warm air mass the cold air moves faster than warm air`

- 13.** The amount of water vapor in the air

## **Down**

- 1.** sometimes two air masses stop moving when they meet
- 3.** a large body of air that has about the same conditions throughout
- 4.** falls as liquid water it freezes on contact with cold surfaces near the ground
- 5.** a warm air mass becomes trapped between two cold air masses

- 7.** The temperature at which water vapor condenses
- 8.** forms in thunderstorms when strong updrafts carry rain high into the troposphere then the rain freezes into balls of ice
- 9.** The boundary between two air masses
- 10.** forms when snow melts as it falls through a layer of warm air then refreezes and turns into clear ice particles
