

Weather crossword

Across

2. A severe storm that develops over tropical oceans and whose strong winds of more than 120km/h spiral in toward the center

9. The ratio of the amount of water vapor in the air to the maximum amount of water vapor the air can hold at a set temperature

10. an area in the atmosphere that has lower pressure than the surrounding areas and has winds that spiral toward the center

12. the short-term state of the atmosphere, including temperature, humidity, precipitation, wind, and visibility

13. a collection of small water droplets or ice crystals suspended in the air, which forms when the air is cooled and condensation occurs

14. A destructive, rotating column of air that has very high wind speeds, is visible as a funnel-shaped cloud and touches the ground

15. The change of state from a gas to a liquid

Down

1. An instrument that measures and indicates temperature

3. The amount of water vapor in the air

4. Any form of water that falls to the Earth's surface forms the clouds

5. The boundary between air masses of different densities

6. A usually brief, heavy storm that consists of rain, strong winds, lightning, and thunder

7. the rotation of air around a high-pressure center in the direction opposite to Earth's rotation

8. The sound caused by the rapid expansion of air along an electrical strike

11. An electric discharge that takes place between two oppositely charged surfaces
