Weather data

Across

2. A device for collecting and measuring the amount of rain that falls.
5. Water falling in drops condensed from vapor in the atmosphere.
6. Frozen or partly frozen rain.
8. A storm with a violent wind, in particular a tropical cyclone in the Caribbean.
10. The perceptible natural movement of the air, especially in the form of a current of air blowing from a particular direction.

Down

1. Each of the four divisions of the year (spring, summer, autumn, and winter) marked by particular weather patterns and daylight hours, resulting from the earth's changing position with regard to the sun.
3. The degree or intensity of heat present in a substance or object, especially as expressed according to a comparative scale and shown by a thermometer or perceived by touch.
4. The state of the atmosphere at a place and time as regards heat, dryness, sunshine, wind, rain, etc.
7. A mobile, destructive vortex of violently rotating winds having the appearance of a funnel-shaped cloud and advancing beneath a large storm system.
9. The weather conditions prevailing in an area in general or over a long period.
