

# Weathering

**Across**

- 4. One other agent of physical weathering
- 7. What water can cause rock to do
- 10. One coastal landform
- 11. Another word for physical weathering
- 14. Stored water underground
- 17. What wind moves
- 18. What streams empty into
- 19. The thing that is broken down
- 21. Moves through spaces and cracks
- 23. Coastal landform
- 26. When lakes and oceans drop something it's called
- 27. What erosion can create
- 28. Breakdown of rock by physical and chemical processes
- 30. What ice wedging causes

- 33. Material moved from one place to the next
  - 34. What ice wedging is called when it is in cracks
  - 35. Erodes rocks by stripping away it's surface
- Down**
- 1. What burns into the air
  - 2. Mounds of wind-deposition
  - 3. Examples of weathering
  - 5. Another agent of physical weathering
  - 6. Underground erosion creates
  - 8. The material moved from one place to the next
  - 9. The process by which eroded material is dropped
  - 12. An agent of physical weathering
  - 13. Where the land and the body of water meet

- 15. Grinding and wearing down of rock by other rock
- 16. What rain normally is
- 20. Agents of physical weathering
- 22. Causes of chemical weathering
- 24. When the roof of a cave collapses is creates
- 25. One agent of physical weathering
- 29. Causes of erosion
- 31. Stream like movements of water
- 32. What reacts with color change
