Weathering and Deposition

Across

- 3. Also called "cold flow" solid material to move slowly or deform permanently under the use of mechanical pressure
- 5. geological process of rocks breaking down but keeping the chemical makeup
- 8. process of eroding or being eroded by wind, water, or natural elements
- 9. area of low-lying ground next to a river, formed mainly of river sediments and likely to flood
- 10. slow moving mass (or river) of ice

- 11. erosion or disintegration of rocks caused by chemical reaction

Down

- 1. sliding down of a mass of earth or rock from a mountain or cliff
- 2. Wears away or changes the appearance or texture of something by long exposure to air
- 4. stress or hardship of a rock
- 6. a fluid/hardened stream/avalanche of mud
- 7. landform that forms of sediment from the mouth of a river into a bigger body of water
