

Week 1 Terminology

Across

- 4. Prosthesis with artificial teeth fixed in place and supported by attachment to natural teeth
- 6. Thin aluminum crown made from a medium hard material for good durability
- 9. Refers to provisional coverage that is already shaped as needed
- 10. Provisional crown made from a hard plastic tooth-colored material used for anterior teeth

- 11. Each component of a bridge
- 12. Indirect restoration in which a thin porcelain material is fused to the facial portion of a gold crown

Down

- 1. Cast created from a final impression used to construct baseplate, bite rims wax setups and finished prosthesis
- 2. Cast restoration that covers anatomic crown of the tooth except for the facial or buccal portion

- 3. Accessory dental item that contains different shades of tooth used to match the color of a patient's teeth
- 5. Displacing gingival tissue away from the tooth
- 7. A temporary custom made to coverage that resembles the tooth to be restored
- 8. A cast restoration designed to replace a conservative class II cavity
