

Welcome To Cell-Tissue City !

Across

7. the basic unit of all living things

9. proteins and lipids are transported

10. allows photosynthesis to occur

11. provides protection (supports)

13. breaks down or recycles cell parts

16. contains genetic material (DNA)

17. "storage center"

18. development or spindle fibers in cell division

20. receives and transmits impulses

Down

1. synthesizes proteins

2. structure and protection (only in the plant cell)

3. "gel-like"

4. insufficient amount of tissue fluid

5. packages proteins

6. "powerhouse" of the cell

8. too much tissue fluid

12. covers body surface

14. allows for controlled and uncontrolled movement

15. only lets some substances to go through

19. studded with ribosomes
