

Whats In The Cell

Across

- 2. The storage area
- 4. Structural and functional unit of all living organisms
- 12. Cells make up animals
- 13. The process by which food and oxygen are converted to energy, carbon dioxide, and water
- 14. A green pigment

- 15. Organelle that contains the green pigment Chlorophyll used in photosynthesis

Down

- 1. Chromosomes store the
- 3. Protects and Supports the plant cell
- 5. Controls movement of materials into and out of the cell

- 6. This controls the center of a cell
- 7. Genetic material of the cell
- 8. Make up plants
- 9. The watery fluid that contains the organelles of the cell
- 10. Cell Structures
- 11. Provides the cell with energy
