# Window and Door Terminology

## Across

4. This window has side hinges that crank outward from either the left or right.

6. The vertical members at the side of the frame.

8. Window units with one or more curved frame members.

11. A fixed framed window made up of 3 or more angles.

12. Framework of stiles and rails in which the glass of a window is set.

13. Horizontal member at the bottom of a window frame.

14. Hinged at the top, this window has a single sash that swings outward from the bottom.

15. A window where the glass is glazed directly into the frame.

## Down

1. A window where the top sash is fixed and bottom sash moves vertically.

2. A framed opening in which a window or door will be installed.

3. A board used to increase the depth of the jambs of a window frame to fit a wall of any given thickness.

5. Limits a window opening to 4" while providing full egress.

7. A window with two vertically moving sashes, each closing a different part of the window.

9. Metal grid in between the panes of an insulating glass unit.

10. To join two or more windows together.
