

Name: _____

Date: _____

Year 7 Chemistry

Across

- 4. something that will not dissolve is....
- 7. used to measure temperature
- 9. method for obtaining pure water
- 12. will not mix
- 14. smallest particle of an element
- 16. a solid that dissolves
- 19. a group of atoms
- 21. formed when something dissolves

22. paper containing separated dyes

23. one element present in water

Down

- 1. group of atoms
- 2. left in the filter paper
- 3. the liquid in which something dissolves
- 5. Liquid changing to solid
- 6. Method for separating a liquid and an undissolved solid
- 8. skull and crossbones
- 10. for a yellow flame, the air-hole is this

11. passes through the filter paper

13. colour of the heating flame

15. gas changing to liquid

17. liquid changing to gas

18. oil does this when combined with water

20. used to add drops of liquid
