

Chapter 11 vocab

Across

2. What do you call a pattern in which the heterozygous phenotype is intermediate between those of the two homozygous parent organisms
5. What type of chromosomes determine an individual's gender
7. What is a chromosome that is not a sex chromosome
8. What is it called when homologous chromosomes are recent decrease in size on a micrograph
10. What do you call when sister chromatids do not separate correctly

11. What is it called when a characteristic is the result from the interaction of multiple gene pairs
12. What do you call having more than two alleles for a specific trait
13. What do you call someone who carries the recessive trait without showing the effects

Down

1. What do you call a characteristic that is controlled by genes on the X chromosome
3. What is a protective cap made of DNA that is found in the end of a chromosome

4. What do you call a diagram of family history that is used to study inheritance patterns

6. What is it called when neither allele is dominant but both are expressed

9. What is the interaction called between alleles in which one of them hides the effect of another
