

Name: _____

Date: _____

biology Ch 11 and 14

Across

6. use of animal and plant breeding

8. structure in cell that can not replicate independently

10. sex cell

12. genetic makeup

13. observable characteristics

14. different forms of genes

17. reproductive cells form to create a new cell

19. three of more of the same gene

20. separation of alleles

Down

1. breeding of individuals with similar characteristics

2. cross between two different things

3. traits controlled by multiple genes

4. one allele is not completely dominant over another

5. identical cells

7. quality or characteristic

9. diagram that predicts genotypes

11. likelihood of something to occur

15. same alleles

16. different alleles

18. determines traits
