

cell cross word

Across

7. makes atp
 8. storage of water, nutrients and wastes
 11. aids in cell division
 12. digests macromolecules
 13. is involved in making proteins
 14. controls functions of the cell contains dna

Word Bank

nucleus
 lysosomes
 eukaryotic cells
 Golgi apparatus
 rough endoplasmic reticulum
 chloroplast

15. makes sugar (photosynthesis)

16. where ribosomes are made

Down

1. makes lipids transports
 2. packages proteins and some polysaccharides
 3. makes proteins, transports

ribosomes
 smooth endoplasmic reticulum
 mitochondria
 centriole
 cell membrane

4. cells that contain a nucleus and is surrounded by a membran

5. does not have a nucleus dna is stored in a loop

6. regulates input and output

9. fluid that contains organelles

10. support structure

nucleolus
 cytoplasm
 vacuole
 cell wall
 prokaryotic cells
