

cell cycle

Across

3. what is the longest part of the cell cycle?

10. the vesicles fuse forms a large sac called the

11. what does each identical chromosomes?

12. what begins by splitting the cytoplasm and separating the two daughter cells.

13. in what stage does chromosomes align in center of a cell?

14. what formation does cytokinesis begin with in animal cell

15. what is the resting phase between successive mitotic divisions of a cell?

Down

1. what does it create when the cell is pinched in two

2. in what stage does chromatin condenses into chromosomes?

4. mitosis is the division of the?

5. what does cell cycle begin with

6. what reforms in a telophase

7. what does cells break to repair the bone

8. in what phase is cell cleaved into new daughter cells.

9. what phase is 'in between'
