

# cell functions and structures

## Across

8. Small structures in the cytoplasm that perform specific functions

9. Jelly like substances all cells have it

10. Make ribosomes

11. The control center

12. Nametag on plasma membrane

13. No cell wall, has centrioles

14. Cell with No nucleus

## Down

1. Where DNA is found in a prokaryotic

2. Make ribosomes

3. Fatty acids

4. Composed of more than a one cell

5. Shipping side of Golgi, they carry cells to destinations

6. Wrap and export proteins

7. All cells have this, Gate Keeper
